

N&E; Operational Risk Engineering

Global Engineering Consultancy — Operational Risk • Commissioning • Project Delivery

Engineering Solutions for Critical Infrastructure Worldwide

Engineering-led Method Statements, full Risk Assessments, Commissioning Strategies, FAT/SAT planning, construction sequencing and Mechanical & Electrical engineering support across ALL industries.

Core Engineering Services

- 1 Engineering-led Method Statements (RAMS)
- 2 Full Risk Assessments & Operational Risk Engineering
- 3 Commissioning Plans & Integrated Test Scripts
- 4 FAT & SAT Planning & Readiness Strategies
- 5 Construction Planning & Project Sequencing
- 6 Mechanical & Electrical Engineering Support

Industries Supported

- 1 Data Centres & Critical Facilities
- 2 Power Generation & Electrical Infrastructure
- 3 Water & Wastewater Treatment
- 4 Industrial Engineering & Construction
- 5 Global Infrastructure Projects

Standards & Engineering Alignment

- 1 CDM Regulations (UK Construction Design & Management)
- 2 ISO 45001 Safety Principles
- 3 IEC & BS Electrical Standards
- 4 Data Centre MOP / SOP / EOP Procedures
- 5 Permit-to-Work & Isolation Systems
- 6 International Commissioning Best Practice

Engineering Delivery Model

- 1 Scope definition and engineering constraint review
- 2 Task breakdown, sequencing and risk analysis
- 3 Development of engineering documentation and commissioning strategy
- 4 Operational readiness and project handover support
